

13th MICROCOLL

7 July 2015
Budapest, Hungary

Call for papers

13th Microcoll

Budapest, Hungary

7 July 2015

It is a tradition that the Microcoll international conference is regularly organized in Budapest in the field of microwave and optical communications. In 2015 this tradition is also revived by organizing the 13th Microcoll in the form of a Workshop which is co-located with the 17th International Conference on Transparent Optical Networks (ICTON'2015).

The Microcoll Workshop will be focused on the hardware and software aspects of fix and mobile microwave, millimeter wave and THz systems. It will be a forum for its traditional topics like wave propagation, antennas, active and passive devices and circuits, metastructures, theory, technology and applications of new microwave and optical approaches. The event is technically sponsored by IEEE MTT-S.

Both events are open for every interested colleague for contribution and/or participation. Authors are cordially encouraged to submit their contributions (4 pages in MS Word accompanied by a PDF version) by e-mail with subject „Microcoll paper” to **diamond@diamond-congress.hu** no later than March 31, 2015. The template is available at the ICTON conference web site: <http://www.itl.waw.pl/konferencje/icton/icton2015>.

Authors of selected papers will be invited to submit extended versions of their papers to the special issue of Periodica Polytechnica, scientific journal of the Budapest University of Technology and Economics.

Deadlines

Paper submission:	31 March 2015
Notification on acceptance:	30 April 2015

Conference chair:
TPC chair:
TPC co-chair:

Dr Lajos Nagy
Dr Tibor Berceli
Dr Eszter Udvary
