## Call for Papers & Author Guidelines

The scope of the Conference is concentrated on the applications of transparent and all-optical technologies in telecommunications, computing and novel applications, and includes:

- Digital all-optical networks
- Ultra-dense wavelength-division multiplexing
- Ultra-fast optical time domain multiplexing
- Next generation networking
- Optical switching and routing (WAOR)
- Optical packet networks and services
- Optical memories and data storage
- Optical transparency and network scalability
- Network reliability and availability (RONEXT)
- Wireless and optical networking (GOWN)
- Radio-over-fibre transmission
- Broadband metro and access networks
- Broadband metro and access networks
- Market in telecommunications (MARS)
- Photonic band-gap structures (ESPC)
- Photonic crystal fibres
- Nonlinear and active PBG devices
- Nanoscale and ultrafast photonics (NAON)
- VCSELs and other novel light sources
- Microresonators and photonic molecules (MPM)
- Novel glasses
- New transmission windows
- Polarisation mode dispersion
- Photonic component integration (PICA)
- Network planning and design tools
- Non-conventional optical communications
- Sub-wavelength photonic devices (SWP)
- Communication in transportation systems (CTS)
- Microwave Circuits and Systems (MICROCOLL)
- Other relevant topics

Authors are cordially encouraged to submit their contributions (max. of 4 pages in MS Word accompanied by a PDF version, **template**) for Regular and Poster Sessions **by e-mail to [icton\(at\)itl.waw.pl](mailto:icton(at)itl.waw.pl) by March 31, 2015.**

The authors will be notified on the acceptance by April 30, 2015. Post-deadline papers with very recent results are requested by June 1, 2015.
